SOFTWARE PROJECTS

Admin Dashboard App - [Deploy Link](#) | [Github Demo](#)

TECHSTACK: MongoDB, Express, React, Node

A personalized mobile responsive Admin Dashboard App to help track and organize your time and enterprise.

- Built application end-to-end using **MERN React.js** framework with **MongoDB/Mongoose** to create a responsive, user-friendly interface with real-time updates
- Built custom data visualizations with **D3.js** to enable data-driven decision making
- Integrated **user authentication** and security features to protect sensitive information
- **Streamlined communication** and collaboration with a built-in chat function, allowing team members to easily share information and stay connected
- Personalized dashboard features enabled users to customize their experience and quickly access the information that matters most

Health + Fitness App - *Currently in Progress*

TECHSTACK: MongoDB, Express, React, Node

A personalized mobile responsive Health + Fitness App that helps users track and plan their health + fitness goals.

- Built application end-to-end using **MERN Full CRUD React.js** framework with **MongoDB/Mongoose** to create a responsive, user-friendly interface with real-time updates
- The application includes **user authentication** with **hashed password** for security
- It pulls data from various **APIs** to provide users with accurate information about their progress
- Users can **create, read, update, and delete** their health + fitness records
- The application provides an **easy-to-use interface** that allows users to track their progress over time
